Autonomous Threat Interception & Resolution Laboratory

REAL-TIME SIMULATOR

Reset to Initial State

Trigger authentic enterprise attack vectors. Witness sub-second neural anomaly detection, MITRE ATT&CK correlation, and autonomous kernel host quarantine.

🔦 ZERO-DAY NOVEL ATTACK PLAYGROUND

Zero Hardcoded Keywords Required

Test any arbitrary, unseen or obfuscated payload. Apex Sentinel extracts statistical vectors, compares against its adaptive baseline, and auto-severs the IP.

1. Raw Polymorphic Shellcode (Zero Keywords)
Unlabelled binary opcodes with high non-printable...

2. Unseen Deserialization Zero-Day (Deep Structural Nesting)
Complex object serialization with extreme structural...

3. Polymorphic Encrypted C2 Beacon (High-Entropy Noise)
Hex-encoded random high-entropy stream mimicking...

4. Benign Operational Telemetry (Baseline)
Standard JSON API heartbeat requests
